

Classic Crackles

SAFETY DATA SHEET (SDS)

Version: 03

Date of Issue: July 28, 2023

According to: OSHA Hazard Communication Standard 29 CFR 1910.1200(g) Rev. 2012

Section 1 – Identification of the Substance/Mixture and of the Company/Undertaking

1.1 Product identifier

Product Name: Classic Crackles

Product Colors: TRANSPARENT CRACKLE (CC101), WHITE CRACKLE (CC102), GREEN TEA (CC107), CHINA SEA (CC108)

Product sizes: 4 oz, 16 oz

Other Means of Identification: None known

Product Description: Liquid glaze formulations intended to be applied with a brush and then placed in a kiln for glaze firing.

1.2 Relevant identified uses of the substance or mixture

Relevant identified use(s): This product is intended for general (adults) arts and crafts purposes.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier: Mayco Colors.
4077 Weaver Court South
Hilliard, OH 43026

Business Phone: 614-675-1171

Email: info@maycocolors.com

1.4 Emergency telephone number

Emergency Telephone: Contact the local poison control centre.

Section 2 – Hazard(s) Identification

2.1. Classification of the substance or mixture

According to: OSHA Hazard Communication Standard 29 CFR 1910.1200(g) Rev. 2012

Health	Environmental ^c	Physical
H371: Specific target organ toxicity (single exposure, Category 2, gastrointestinal tract) ^b	H400: Hazardous to the aquatic environment - short term (acute) hazard (Category 1) ^{a, c} H411: Hazardous to the aquatic environment - long term (chronic) hazard (Category 2) ^{a, c}	Not classified

^a Environmental hazards are outside the scope of OSHA; therefore, product classification for acute aquatic toxicity (Category 1) and chronic aquatic toxicity (Category 2) are not mandatory.

^b Classifications only apply to the color, CHINA SEA (CC108).

^c Classifications are listed as a worst-case scenario for the final product, based on the environmental concerns posed by the color, CHINA SEA (CC108). It should be noted that the remaining colors present environmental concerns; however, these concerns are to a lesser degree.

Label Pictogram:

Signal Word: Warning

Hazard statements & Precautions:

Specific target organ toxicity (single exposure, Category 2, gastrointestinal tract) (H371) ^b

May cause irritation to gastrointestinal tract through oral exposure.

P264: Wash hands thoroughly after handling.

P270: Do not eat, drink or smoke when using this product.

P308 + P316: IF exposed or concerned: Get emergency medical help immediately.

P405: Store locked up.

P501: Dispose of contents/container in accordance with local, regional, national, and/or international regulations.

Hazardous to the aquatic environment - short term (acute) hazard (Category 1) (H400) ^{a, c}

Very Toxic to aquatic life with long lasting effects.

P273: Avoid release to the environment.

P391: Collect spillage.

P501: Dispose of contents/container in accordance with local, regional, national, and/or international regulations.

Hazardous to the aquatic environment - long term (chronic) hazard (Category 2) (H411) ^{a, c}

Toxic to aquatic life with long lasting effects.

P273: Avoid release to the environment.

P391: Collect spillage.

P501: Dispose of contents/container in accordance with local, regional, national, and/or international regulations.

^a Environmental hazards are outside the scope of OSHA; therefore, product classification for acute aquatic toxicity (Category 1) and chronic aquatic toxicity (Category 2) are not mandatory and the environmental hazard pictogram is optional.

^b Classifications only apply to the color, CHINA SEA (CC108)

^c Classifications are listed as a worst-case scenario for the final product, based on the environmental concerns posed by the color, CHINA SEA (CC108). It should be noted that the remaining colors present environmental concerns; however, these concerns are to a lesser degree.

Supplemental Hazard Information: None

2.3. Other hazards

- No other hazards have been identified for this product.

3.1 Substances

The product is a mixture and not a substance.

3.2 Mixture

Chemical Name	CAS No.	EC No.	% Concentration ^a	GHS Hazards
Crystalline silica	14808-60-7	238-878-4	up to 1.3638%	H350: Carcinogenicity (Category 1) (Inhalation); H372: Specific target organ toxicity (repeated exposure, Category 1, lungs)
Titanium dioxide	13463-67-7	236-675-5	up to 0.1637%	H351: Carcinogenicity (Category 2) (Inhalation)
Trisodium hexafluoroaluminate	13775-53-6	237-410-6	up to 4.2386%	H332: Acute inhalation toxicity (Category 4); H372: Specific target organ toxicity (repeated exposure, Category 1, lungs); H411: Hazardous to the aquatic environment - long term (chronic) hazard (Category 2)
Cupric oxide	1317-38-0	215-269-1	up to 0.3313%	H373: Specific target organ toxicity (single exposure, Category 2, gastrointestinal tract); H400: Hazardous to the aquatic environment - short term (acute) hazard (Category 1); H410: Hazardous to the aquatic environment - long term (chronic) hazard (Category 1)
Zinc pyrithione	13463-41-7	236-671-3	up to 0.0072%	H301: Acute toxicity - oral (Category 3); H318: Eye damage (Category 1); H330: Acute toxicity – inhalation (Category 2); H372: Specific target organ toxicity (repeated exposure, Category 1); H360D: Reproductive toxicity (Category 1B) (May damage the unborn child); H400: Acute aquatic toxicity (Category 1); H410: Chronic aquatic toxicity (Category 1)

^a Concentrations are calculated as a maximum across all products, rather than by color.

The other ingredients in the product are either considered non-hazardous or are below their respective GHS cut-off values/concentration limits in the final product and were therefore not disclosed in the SDS.

The product contains crystalline silica (CAS No.14808-60-7) and titanium dioxide (CAS No. 13463-67-7) which may be hazardous when inhaled. Given the nature and physical form of the product (*i.e.*, liquid) airborne respirable particles would not likely be released from the product and therefore the hazard is not relevant to the product.

Assessment of this product was based on the assumption that the glaze will not be sanded after it has been fired in the kiln.

Section 4 – First Aid Measures

4.1 Description of first aid measures

Eye contact: No specific first aid measures are required. As a precaution, remove contact lenses, if worn, and immediately flush eyes with water. Seek medical attention if in doubt.

Skin contact: No specific first aid measures are required. If irritation occurs, wash with plenty of water and soap. Take off contaminated clothing. If skin irritation persists: Seek medical attention if in doubt.

Inhalation: No specific first aid measures are required. Inhalation route of exposure is not anticipated with intended use. If exposed to excessive levels of material in the air, move the exposed person to fresh air. Seek medical attention if in doubt.

Ingestion: IF SWALLOWED: Get emergency medical help immediately. Rinse mouth with water. Do NOT induce vomiting. Never give anything by mouth to an unconscious person.

4.2 Most important symptoms and effects, both acute and delayed

- Refer to **Section 11 - Toxicological Information.**

4.3 Indication of any immediate medical attention and special treatment needed

- Not required.

Section 5 – Fire Fighting Measures

5.1 Extinguishing media

Suitable Extinguishing Media: Use extinguishing media suitable for surrounding area if material is involved in a fire (e.g., water fog, water spray, foam, dry chemical or carbon dioxide).

Unsuitable Extinguishing Media: None known.

5.2 Special hazards arising from the substance or mixture

Hazardous combustion products:

- Irritating vapours or fumes may form if product is involved in fire:
- Also see **Section 10 - Stability and Reactivity.**

5.3 Advice for firefighters

- Wear a self-contained breathing apparatus to protect against potentially irritating vapours or fumes.

Section 6 – Accidental Release Measures

6.1 Personal precautions, protective equipment (PPE) and emergency procedures

Personal Precautions: Avoid dust formation. Ventilate area if spilled in confined space or other poorly ventilated areas. Observe PPE advice in **Section 8 – Exposure Controls/Personal Protection.**

Emergency Procedures: Evacuate personnel to safe areas.

6.2 Environmental precautions:

- Prevent entry and contact with soil, drains, sewers, and waterways. Inform relevant local/regional/national/international authorities. Prevent further leakage or spillage if it is safe to do so.

6.3 Methods and material for containment and cleaning up

Containment/Clean-up Measures: Contain spill if safe to do so. Do not dry sweep dust. Wet dust with water before sweeping or use a vacuum to collect dust. Dispose of contents/container in accordance with local/regional/national/international regulations.

6.4 Reference to other sections

- Refer to **Section 8 – Exposure Controls/Personal Protection** and **Section 13 – Disposal Considerations.**

7.1 Precautions for safe handling

- When using do not eat, drink or smoke. Wear appropriate personal protective equipment. Keep containers closed and locked away in a well-ventilated space when not in use. Wash thoroughly after handling. Wash contaminated clothing before reuse
- Employees should be trained in the safe use and handling of chemical materials.
- Refer to **Section 8 - Exposure Controls/Personal Protection**

7.2 Conditions for safe storage, including any incompatibilities

- Keep container tightly closed to avoid spills.
- Keep in a cool dry place.

7.3 Specific end use(s)

- Refer to **Section 1.2 - Relevant identified uses.**

Section 8– Exposure Controls / Personal Protection

8.1 Control Parameters:

Occupational exposure limits: Airborne particles, such as dust, are foreseeable under conditions of normal use.

Chemical Name	CAS No.	ACGIH TLVs TWA	OSHA PELs TWA	NIOSH RELs TWA	DFG MAK TWA
Crystalline silica	14808-60-7	0.025 mg/m ³ R	0.05 mg/m ³	0.05 mg/m ³	N/A
Titanium dioxide	13463-67-7	Nanoscale particles : 0.2 mg/m ³ R Finescale particles : 2.5 mg/m ³ R	15 mg/m ³	N/A	0.3 mg/m ³ R
Cupric oxide	1317-38-0	1 mg/m ³ (dusts & mists)	15 mg/m ³ (dusts & mists)	1 mg/m ³ (except fume)	N/A
R	Measured as respirable fraction of the aerosol				
N/A	Not applicable				

8.2 Exposure Controls:

Appropriate engineering controls

- No special requirements under ordinary conditions of use and with adequate ventilation. Mechanical ventilation or local exhaust ventilation may be required. In case of dust formation use a respirator with an approved filter.

8.3 Personal Protective Equipment

Note: Consider the concentration and amount of product at the workplace when selecting PPE. Use protective equipment as required.

Respiratory:	Use appropriate respiratory protection when handling to minimize exposure to dust particles. Consult with an industrial hygienist to determine the appropriate respiratory protection for your specific use of this material. A respiratory protection program compliant with all applicable regulations must be followed whenever workplace conditions require the use of a respirator.
Eyes/Face:	If contact is likely, safety glasses with side shields are recommended. An eyewash bottle or station should be available in the workplace. Wear a face shield if splash or spray is likely.
Hands:	Use good industrial hygiene practices to avoid skin contact. If contact with the material may occur, wear chemically protective gloves.
Body/Skin:	Wear chemically impervious gloves, coveralls, apron, boots as necessary to minimize contact. Do not wear rings, watches or similar apparel that could entrap the material.

Thermal Hazards: None known.

Environmental Exposure

Controls: Not available.

Hygiene measures:

Observe good industrial hygiene practices. Avoid contact with skin. Contaminated work clothing should not be allowed out of the workplace and should be washed before reuse. When using the product do not eat, drink or smoke.

Section 9 – Physical and Chemical Properties

9.1 Information on basic physical and chemical properties

Note: The data below are typical values and do not constitute a specification.

Appearance: Physical state: Form: Color: Odor:	Liquid See section 1.1 Not available	Partition Coefficient n-octanol/water: Auto-ignition temperature:	Not available Not available
pH (as supplied):	8 -9	Decomposition temperature:	Not available
Freezing point:	32° F	Dynamic viscosity:	Not available
Boiling point:	100° F	Molecular weight:	Not available
Flash point:	Not available	Taste:	Not available
Evaporation rate:	Not available	Explosive properties:	Not available
Flammability:	Not available	Oxidizing properties:	Not available
Upper/lower explosive limits:	Not available	Surface tension:	Not available
Vapor pressure:	Not available	Volatile component:	Not available
Water solubility:	Not available	Gas group:	Not available
Vapor density (Air = 1):	Not available	pH (as solution):	Not available
Specific gravity (Water = 1):	Not available	VOC:	Not available
Relative density:	Not available	Particle size range:	Not available

9.2 Other information

- No data available

Section 10 – Stability and Reactivity

10.1 Reactivity

- This material is not considered to be reactive under normal handling and storage conditions.

10.2 Chemical stability

- This material is considered stable under normal handling and storage conditions.

10.3 Possibility of hazardous reactions

- Not expected to occur under normal handling and storage conditions.

10.4 Conditions to avoid

- Exposure to high temperatures
- Strong acids
- Strong bases
- Strong oxidisers

10.5 Incompatible materials

- Strong acids
- Strong bases
- Strong oxidizing agents
- Strong reducing agents

10.6 Hazardous decomposition products

- Thermal decomposition or combustion may generate smoke, carbon monoxide, carbon dioxide, and other products of incomplete combustion. Irritating and toxic substances may be emitted upon combustion, burning, or decomposition of dry solids.

Section 11 – Toxicological Information

11.1. Information on hazard classes:

Likely routes of exposure: Skin/eye contact, inhalation of dusts.

Potential signs and symptoms:

Acute oral toxicity:	The product is practically nontoxic based on available animal and human use data. ATE >5000 mg/kg.
Acute dermal toxicity:	The product is practically non-toxic based on available animal and human use data. ATE >5000 mg/kg.
Acute inhalation toxicity:	Trisodium hexafluoroaluminate (CAS No. 13775-53-6) is classified for acute inhalation toxicity (Category 4); however, product classification is not warranted given a review of the available data and the nature of the product (<i>i.e.</i> , liquid). The product is practically non-toxic based on available animal and human use data.
Skin corrosion/irritation:	The components in this product >1% are not corrosive to the skin or skin irritants based on human and/or animal studies.
Serious eye damage/irritation:	The components in this product >1% are not damaging to the eyes or eye irritants based on human and/or animal studies.
Respiratory or skin sensitization:	The components in this product >0.1% are not sensitizing to the skin or respiratory system based on human and/or animal studies.
Mutagenicity:	The components in this product >0.1% are not mutagenic based on animal studies or no data identified for the components in this product .
Carcinogenicity:	Crystalline silica (airborne, unbound particles of respirable size) (CAS No. 14808-60-7) has been classified for carcinogenicity (Category 1). Titanium dioxide (CAS No. 13463-67-7) has been classified for carcinogenicity (Category 2). Product classification is not warranted based on the nature of the product (<i>i.e.</i> , liquid). Crystalline silica and titanium dioxide are listed as carcinogens by IARC, NTP and ACGIH. The other components in the product >0.1% are not carcinogenic based on animal studies or no data identified for the components in this product.
Reproductive Toxicity:	The components in this product >0.1% are not reproductive toxicants based on animal studies, or no data identified for the components in this product.
Specific target organ toxicity (single exposure):	Cupric oxide (CAS No. 1317-38-0) has been classified for specific target organ toxicity (single exposure, Category 2; may cause irritation to the gastrointestinal tract through oral exposure). The other components in this product >1% are not single exposure specific target organ toxicity (single exposure) hazards based on animal studies or no data identified for the components in this product

Specific target organ toxicity (repeated exposure):

Crystalline silica (CAS No. 14808-60-7) has been classified for specific target organ toxicity (repeated exposure, Category 1; causes damage to lungs through prolonged or repeated exposure via inhalation). Trisodium hexafluoroaluminate (CAS No. 13775-53-6) is classified for specific target organ toxicity (repeated exposure, Category 1; causes damage to lungs through prolonged or repeated exposure via orally and inhalation). Product classification is not warranted given the nature of the product (i.e., liquid) and based on a review of available data. The other components in this product >1% are not repeated exposure specific target organ toxicity hazards based on available information, human and/or animal studies.

Aspiration hazard:

The components of this product >1% are not aspiration hazards based on animal studies or no data identified for the components in this product.

Section 12 – Ecological Information

12.1 Toxicity

- Environmental hazards are outside the scope of OSHA. Based on the criteria outlined in the 9th revision of the GHS, product classification for acute aquatic toxicity (Category 1) and chronic aquatic toxicity (Category 2) is warranted which results in the Transportation Information provided in Section 14.

Chemical Name	CAS No.	Species	Result
Cupric oxide	1317-38-0	<i>Fathead minnow</i>	LC ₅₀ (96h): 38.4 µg/L – 256.2 µg/L
		<i>Daphnia magna</i>	NOEC (32d): 188 µg Cu/L
		<i>Raphidocelis subcapitata</i>	NOEC (48h): 1 µg/L - 35 µg/L
		<i>Lemna minor</i>	NOEC (7d): 30 µg/L
Trisodium hexafluoroaluminate	13775-53-6	<i>Brachydanio rerio</i>	LC ₅₀ (96h): 99 mg/l
		<i>Daphnia magna</i>	EC ₅₀ (48h): 156 mg/l
		<i>Pseudokirchneriella subcapitata</i>	ErC ₅₀ (72h): 8.8 mg/l
Zinc pyrrithione	13463-41-7	<i>Pimephales promelas</i>	LC ₅₀ (96h): 0.0026 mg/L NOEC (96h): 0.011 mg/L
		<i>Daphnia magna</i>	LC ₅₀ (48h): 0.0082 mg/L NOEC (48h): 0.011 mg/L
		<i>Selenastrum capricornutum</i>	EC ₅₀ (120h): 0.028mg/L NOEC (120h): 0.0078 mg/L

12.2 Persistence and degradability

- No data available for the product.

12.3 Bioaccumulative potential

- No data available

12.4 Mobility in Soil

- No data available for the product.

12.5 Results of PBT and vPvB assessment

No data available for the product.

12.6 Endocrine disrupting properties

- No data available for the product.

12.7 Other adverse effects

- No further data available.

Section 13 – Disposal Considerations

13.1 Waste treatment methods

Preparing wastes for disposal: Use product for its intended purpose or recycle if possible. Dispose of waste in accordance with local, regional, national, and/or international regulations. The empty container has residues which may exhibit hazards of the product.

Contaminated Packaging: Container packaging may exhibit hazards.

Section 14 – Transport Information

14.1 UN number	3082
14.2 UN proper shipping name	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S.
14.3 Transport hazard class(es):	9
14.4 Packing group	III
14.5 Environmental hazards	Acute and Chronic
14.6 Special precautions for user	274, 335, 601
14.7 Maritime transport in bulk according to IMO instruments	If the product is transported in bulk, the regulations are applied to the product.

Section 15 – Regulatory Information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Note: The information that was used to confirm the compliance status of this product may deviate from the chemical information shown in **Section 3 – Composition / Information on Ingredients**.

United States

Federal Regulations:

Comprehensive Environmental Response and Liability Act of 1980 (CERCLA):

No components in this product >0.1% are subject to reporting under CERCLA.

Clean Water Act (CWA): Zinc compounds are listed by the CWA as toxic pollutants. No other components in this product are listed as toxic pollutants.

Clean Air Act (CAA): No components in this product are listed under the CAA.

Superfund Amendments and Reauthorization Act (SARA) Title III Information:

SARA 302 Components: No components in this product are subject to reporting requirements of S.302.

SARA 304 Emergency Release Notification: None.

SARA 311/312 Hazards: None.

SARA 313 Components: Copper compounds and methanol (CAS No. 67-56-1) are subject to reporting requirements of S.313. No other components in this product are subject to reporting requirements of S.313

Toxic Substances Control Act (TSCA): Bentonite (CAS No. 1302-78-9) is not listed on the TSCA. All other components are listed on the non-confidential TSCA inventory or are exempt.

State Regulations:

California: Crystalline silica [(listed as silica, crystalline (airborne particles of respirable size)] and titanium dioxide (airborne, unbound particles of respirable size) are listed on the California Proposition 65 List, as chemicals known to the State of California to cause cancer. Given the nature and physical form of the product (i.e., liquid), airborne respirable particles would not likely be released from this product and therefore the listed forms of silica, crystalline and titanium dioxide are not relevant for the product. Methanol (CAS No. 67 56-1) and 2,3,7,8 TCDD (CAS No. 1746-01-6) are listed on the Proposition 65 List. A screening assessment indicates that the levels of these chemicals in the product does not warrant warnings for the purpose of California Proposition 65. No other components in this product are listed on the Proposition 65 List.

International:

IARC: Crystalline silica (CAS No. 14808-60-7) is listed in Group 1, carcinogenic to humans. Titanium dioxide (CAS No. 13463-67-7) is classified as Group 2B, possibly carcinogenic to humans. No other components of this product are classified with respect to carcinogenicity.

15.2 Chemical Safety Assessment

- None available for the components in this product.

Section 16 – Other Information

The product, Classic Crackles [CHINA SEA (CC108)], must be properly labeled for known health risks (i.e., gastrointestinal irritation) and should reflect the ACMI CL Seal. The remaining colors are considered safe and certified to contain no materials in sufficient quantities to be toxic or injurious to humans, including children, or to cause acute or chronic health problems.

List of acronyms and abbreviations:

ACGIH: American Conference of Governmental Industrial Hygienists	NTP: National Toxicology Program
ATE: Acute Toxicity Estimate	OSHA: Occupational Safety and Health Administration
CAA: Clean Air Act	PBT: Persistent, Bioaccumulative and Toxic
